

Best practice in corporate health management

Developed by HRM Systems, the software Carema supports the process of employee care with modules for monitoring, absence management and case management. Together with UKA Solutions, the software provide the optimal technical foundation for a professional corporate health management.

Comprehensive features for absence and case management

- ▶ Detection of frequent (short) absences and long-term cases
- ▶ Automatic transmission of pending meeting minutes to the line manager
- ▶ Administration of long-term cases (case management)
- ▶ Role-based authorisation concept enables interdisciplinary cooperation
- ▶ Company-specific configuration of meeting documents

State-of-the-art technology

- ▶ Intuitive and user-friendly operation
- ▶ Company-specific configuration of meeting documents
- ▶ Full integration into existing IT systems

Significant benefit for the company and the employees

- ▶ Reduction of the absence rate, fluctuation and costs
- ▶ Increased employee satisfaction due to comprehensive mentoring
- ▶ Overall increased productivity
