# Accident and illness management made easy

The UKA Connect software, exclusively developed by HRM Systems AG, allows companies to manage accident and illness cases efficiently.

# Functionalities and benefits

### Insurance cases for accident and illness

- Administration of accident and illness incidents
- Integration of UKA Send so an employee can electronically submit their accident report to HR
- Electronic transmission of case reports to the insurer including medical certificates and documents

### Integration of Abacus and MyAbacus

- Automatic synchronisation of employees' master and wage data
- Automatic synchronisation of company data and insurance contracts
- Direct access via MyAbacus without a separate login
- Incident overview and information in MyAbacus

### Security and performance

- UKA Connect is a browser-based software as a service solution
- HRM Systems as the operator is ISO 9001 and GoodPriv@cy certified
- The software operates in Switzerland, in a dedicated environment
- The data centres and backups are ISO 9001 and ISO 27001 certified and fully operate in Switzerland
- Access is protected by firewall and SSL encryption

### Requirements

- Abacus Version 2022 R2 or higher
- MyAbacus incl. company subscription Medium

ABACUS
