

Cost reduction thanks to comprehensive support in the accident management process

HRM Systems supports companies insured by Suva in reducing their accident-related costs. This is achieved through targeted services in the areas of prevention, processing and representation of interests when it comes to optimising premiums.

Representation of interests

- Insurance structure
- Assistance with legal procedures
- Optimising premiums

Processing

- Appropriate risk exposure thanks to review and changes to accident reports by our experts
- Support in identifying and clarifying potential pension cases
- Expert guidance by our specialists on insurance-related questions

Prevention

- Provision of a data foundation for preventive measures
- Insightful and interactive reporting
- Identification of key areas for prevention

High transparency – lower costs – lower premiums

Every individual accident is reviewed by our specialists. Our verified data and expert knowledge enable you to identify any premium-related cases and their long-term implications at an early stage. This facilitates coordination on your part and ensures the smooth implementation of reintegration measures.
